

Take the City of Ionia Microtransit Study Survey

The City of Ionia is launching a new microtransit transportation service called I-Go. I-Go will be a real-time, on-demand service that provides trips throughout the Ionia service area. I-Go is a new service, expanding I-DART's current service options. To ride I-Go, you would request and pay for your ride with a mobile app or by phone. Once your trip is booked, on the mobile app you could track the progress of the vehicle until it arrives at your designated pickup location. You can book rides in real-time or by scheduling your trip in advance. The service is similar to Uber or Lyft, but will be more affordable.
